

CESI RICERCA

*White Certificates:
the Italian experiences gained in Regulation,
Monitoring & Verification and Electricity Market contexts.*

Background and workshop organisation

Antonio Capozza

Department of Power System Development

CESI RICERCA

Milano

October 22nd 2008

Background

- Italy begun considering the White Certificates issue in 2001
- A quite intensive preliminary activity for implementation
- Insistive legislation on the subject: **20/7/04**
- Italy has been practising a White Certificates scheme **for four years**

Background

Italian involved actors:

- **AEEG** - the Regulatory Authority for Electricity and Gas, who set up the rules and the guidelines for the scheme,
- **GME** - the electricity Market Operator,
- **ENEA** - the National Energy Agency entrusted of Monitoring and Verification of many of the energy efficiency projects)
- **Obligated and Eligible agents**
- **CESI RICERCA** - one of the main contributors for the EE evaluation procedures for the eligible projects

Osmosis among national
and international
experiences gained so far

Programme of the workshop

- **Former part: national review**
 - Balance of the operation from Authority
 - Contribution of CESI RICERCA on EE procedure set-up
 - Trade experiences from the Market Operator
 - Experiences of Monitoring and Verification from ENEA
 - Feedback from operators eligible for EE projects

Programme of the workshop

- **Latter part: international contributions**
 - Experiences from the UK Energy Efficiency Commitment
 - Viewpoint of EC on a EU-wide scheme for White Certificates
 - Extra-EU experiences, updates on the scheme of New South Wales (Australia)

Programme of the workshop

- **Final discussion**
 - EU-wide schemes and related problems
 - Harmonisation among evaluation procedures
 - Questions on the presentations

Thank you
