Dear Antonio,
Thankyou very much for this prompt information. We will process it for NL and make a new appointment with the Dutch Ministry. They have your proposal already.
I will keep you closely informed from now when/if there are any positive developments. I presume it is still open for participation? I havent spoken with Arno Sijben about these latest developments, but will if they are ready to participate.

Related to the SETREC project, we have just drafted a Report on Italy and I was wondering if you might be able to have a look over it as an expert opinion?

Kindest regards,
Verity

Dear Verity,
the potential of White Certificates can be evaluated in a numerical way if we connect it:

- to the size of the national energy savings (ES) targets in force or in programme in the Countries where this trading scheme is/will be adopted and
- to the number of the obliged (to perform ES projects) actors and to the size of their markets.

I tried to synthesise these figures in the below table, according to my present knowledge of the matter.

Country	Size of ES targets	Duration	Obliged actors
Market size	(TWh/y)	(y)	
UK	64	3	
11 electr. suppliers	99%		
Italy	20	5	
22 gas suppliers	60%		
8 electr. suppliers	98%		
France	18	3	----
--			

Moreover, a proposal of EC was issued for a European Directive on energy end-use efficiency and energy services, which will require form

suppliers yearly energy savings ranging from 1% to 5%, also adopting White Certificates schemes.

All details about the workplan are attached herein. I hope I was able to fulfill your requirements. Let me know if you need some more information.

Oggetto: DSM - White Certificates

Dear Antonio,

I have had brief discussions with the Dutch Ministry for Economic Affairs promoting participation in your task. I am project managing the EC SETREC project (www.setrec.info) at the moment where I am in close contact with them and I thought they should be interested in white certificates also. They are interested but they want us to advise them on what sort of potential white certificates systems can have for them related to their targets before they will commit to anything. Can you give me any figures (or IEA position) on potentials? I have tried to call you. Please call me anytime on +31-6-51824363.

My kindest regards,
Verity
