

Swedish Project on White Certificates:
Reporting on the 2nd Workshop
“Policy and principle issues”

Contribution to the IEA-DSM Task XIV on White Certificates
15 April 2005 – Paris

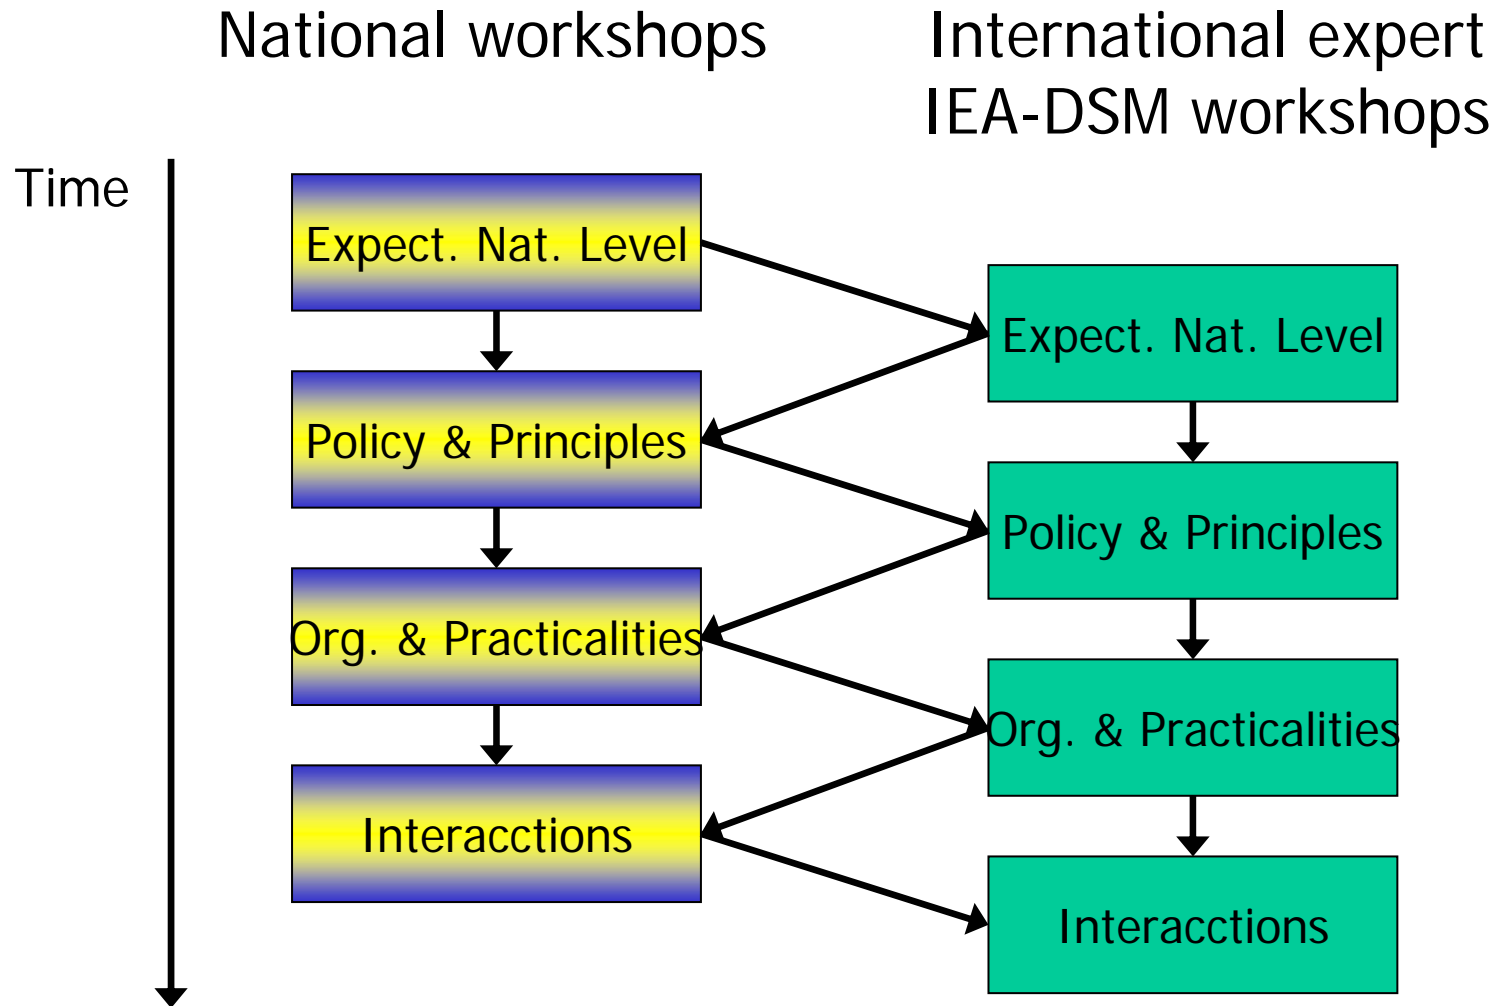

Luis Mundaca & Lena Neij
International Institute for Industrial Environmental Economics at
Lund University

Purpose of presentation

To provide an overview of the work done in Sweden so far and in relation to the IEA-DSM task

→ Outcomes of the 2nd national workshop

Working approach

Project objective

- To increase the knowledge and understanding of this policy instrument
- To learn from the experience that Great Britain, Italy and France when it comes to the analysis

Key research questions

- Is a White Certificate scheme a suitable policy instrument for Sweden?
- How could the White Certificate scheme be designed for Sweden?

2nd Nat. Workshop

- Objectives:
 - Discuss inputs and linkages from/with different related initiatives
 - Discuss “Policy Scenarios”
 - Policy goal(s)?
 - Eligible end-use sectors?
 - Eligible and obligated actors?
 - Eligible energy carriers?
 - Eligible measures?

Conclusions

- National interest seems to be growing
- Focusing on Residential & Commercial sectors, two policy scenarios were selected for further analysis:
 - CO₂ emission reductions
 - Energy efficiency

Workshop – Draft

National or international systems for White Certificates - Lessons to learn from projects on Green certificates

- 10.00-11.30 Intro to White Certificates
EEC in Great Britain
White Certificates in Italy
