

Description of integrated pilots/demonstrations/field tests/existing practices

1. Name of the case Fenix C-VPP

2. What is integrated with DSM

DG

Energy storage

Smart grid technologies

3. What is the level of commercialization

Research project

Demonstration

Field test

Existing practice

4. Where to find more information?

- Contact person
- Company EDF UK
- web-site
- references

5. Objectives of the case Use a cluster of shiftable load and generation and combine with embedding of intermittent renewables

6. Business rationale/model Optimize portfolio

7. Technologies used Medium size generators and consumers interfaces with ICT

8. Short description of the case Awaiting input from Koen Kok

9. Achieved/expected results (operational savings, CO₂, efficiency enhancement)

10. Lessons learnt
