Executive Secretary, IEA DSM Programme  
Operating Agent Task XXI

## **RE: Task XXI - Revised Work Plan Standardisation of Energy Savings Calculations**

The Swedish Energy Agency approves the revised work plan for standardisation of energy savings calculations.

However, at this moment the agency has taken the decision not to take part in this new task. The reason for this is a current limited availability of expertise.

### **Modification:**

The agency requests top-down calculation methods to be included in the work plan.
